

BELLA CONTOUR  
by REAL AESTHETICS

## You're Not Alone in Wanting a More Sculpted Body

Looking great takes time and effort. Following a healthy lifestyle, exercising and dieting are all vital. But, often, stubborn fat stays right where you don't want it – around your abdomen, thighs, buttocks, and other all-too-obvious places.

Now you have a new world of options. With easy, painless Bella Contour body contouring treatments, you can target exactly the areas of your body where you want to slim down, and achieve a trimmer-looking, more contoured figure – with near-immediate and long-lasting results. You can get rid of pregnancy fat, reduce the circumference of target areas and reduce cellulite.

Results  
in Just  
1 Hour

\* Bella Contour is FDA cleared for temporary cellulite reduction and undergoing clinical studies for body contouring and circumference reduction.

## Bella Contour – The Ultimate Body Contouring Natural Experience

## Shape New You

## REAL™ Technology. Real Results.

Bella Contour, by Real Aesthetics, offers the ultimate body contouring and sculpting experience – non-invasive, painless, cellulite reduction that delivers real, measurable results from the very first treatment session.

Based on its unique REAL™ (Resonant Amplification of Lipid Metabolism) technology, which utilizes a combination of three proven technologies – resonant ultrasound, electrical current fields and lymphatic drainage – Bella Contour provides a proven safe and effective solution for fast, targeted body contouring in common problem areas, such as the abdomen, “love handles”, buttocks and thighs. The treatment stimulates the fat cells, causing the fat inside them to break down into lipids, FFA and glycerol, and be released and then eliminated as part of the body’s natural metabolic process.

### Safe, Assured Body Contouring

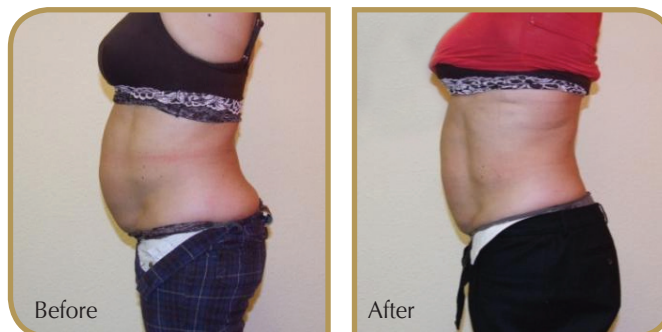

Bella Contour treatment is pain-free. It delivers immediate, clearly visible and long-lasting results: a more sculpted appearance, tighter skin, reduced cellulite, reduced circumference measurements.

The Bella Contour body contouring system is FDA-cleared and CE Approved and has been on the market for more than six years. More than 5000 people around the world have been treated with Bella Contour, with outstanding satisfaction rates. The vast majority – 92% – of people achieve circumference reduction of at least 4 cm (1.57 in) after completing the course of treatments.

### Thousands of Happy Patients Have Already Enjoyed the Following Benefits:

- **Proven circumference reduction results** – based on thousands of patients treated by Bella Contour worldwide
- **Natural, safe, non-invasive treatment** – the first device that amplifies natural metabolism and elimination of fat
- **Visible results with objective measurement system** – results are recorded and displayed via dedicated built-in software to easily follow progress
- **Long lasting body contouring** – no need for maintenance treatments after completion of the treatment course

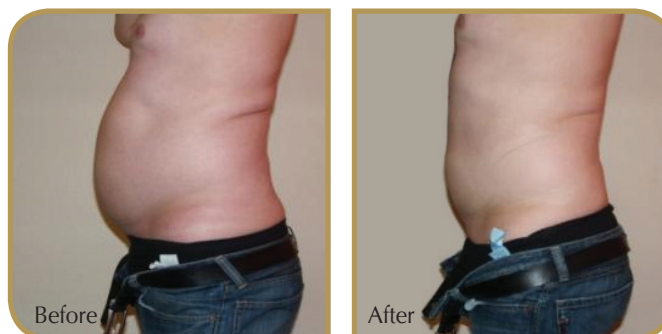

Imagine dropping clothes sizes... getting into your old favorite jeans... achieving a more defined silhouette in a swim suite... Bella Contour can help you shape a new reality that fits your goals.

After 10 treatments, reduction of 13.5 cm  
Abdomen

After 10 treatments, reduction of 3 cm  
Thighs and Buttocks

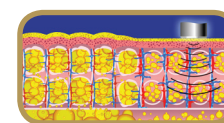

After 10 treatments, reduction of 6.5 cm  
Abdomen

Unique technology combination enables effective circumference and cellulite reduction. In a typical treatment session, resonant ultrasound and electrical current fields are applied simultaneously for approximately 40 minutes. Lymphatic drainage is then applied for approximately 10 minutes.

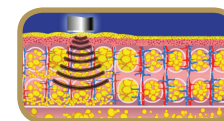

### How Does Bella Contour Work?

- High frequency, low-intensity ultrasound stimulates fat cells to release the fat cell content (lipids) without rupturing the cell membrane.
- Electrical current fields help lipids leave the cell by increasing cell permeability without damaging the cell membrane.
- The released fat is absorbed in the surrounding tissues, where it enters the blood stream into the lymphatic system.
- Gentle lymphatic therapy through vacuum massage helps transport lipids into the bloodstream by locally increasing blood flow in the treated area.

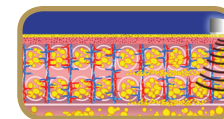

### The Bella Contour Natural Treatment

Common fat deposits

Fat deposits break down into lipids, FFA and glycerol

Fat deposits released and then eliminated as part of the body's natural metabolic process

### Enjoy the Already Proved Success Results

An independent study based on real commercial patients using the Bella Contour, verified the greater the number of treatments, the greater the circumferential reduction. Data analysis on an entire group of 703 individuals has proved a success rate of 92%!
